Please note: These items are included in our standard Home Visitor resource pack.

Home Visitors may bring a selection of the items to sessions to support various activities that foster parent-child interaction and promote child development.

Some items will be used more frequently and may need to be replaced from time to time. As the materials remain with the Home Visitor, it's not uncommon for challenges to arise at the end of a session when encouraging the child to return an item. This, however, presents a great opportunity to support parents in being able to navigating boundaries and transitions with their child.

Most of these items can be sourced easily and locally. We typically recommend using a 10kg wheeled bag to store and transport the resources — consider it a little shopping spree to get you started!

Feel free to expand on this list and add items based on your own creativity and the needs of the families you support. Each family is unique, and over time, you'll get a feel for what works best in different situations. Innovation is always welcome!
